FIRST TIME SETUP

- AUTO-CONNECTING EARBUDS**: Quick press both buttons. White lights will flash to indicate earbuds are automatically pairing to each other.
- CONNECTING TO BLUETOOTH**: Once earbuds are paired, a quick press of both buttons indicates the earbuds are ready to connect to your Bluetooth device.
- CONNECTING TO BLUETOOTH CONTINUED**: Select "Pair Device" in the JLab app settings. Blue lights on case and earbuds will indicate earbuds are being connected to a device.

BLUETOOTH PAIRING NEW/ADDITIONAL DEVICES: When the earbuds are taken out of the charging case, the earbuds will automatically enter Bluetooth pairing mode if they do not find a previously paired device. If they do find a previously paired device, the earbuds will turn off and search for a connected device and turn ON a new device. Select "Add Device" in the device settings to connect.

AUTO-POWER ON/OFF: When earbuds are removed from the case for first use, they will automatically turn on and charge. Blue lights on case and earbuds will indicate earbuds are charging and return to the case when charged.

AUTO-POWER ON/OFF CONTINUED: When earbuds are removed from the case for second use, they will automatically turn on and recharge to your device. If the BLUETOOTH PAIR-NEW DEVICE (PAIR) button is pressed to connect another device.

FITTING

- 1 Take the earbud toward the ear and along the ear hook on the base case and start moving the earbud toward the ear.
- 2 Locate the earbud to the ear canal and rotate inward.
- 3 Rotate and adjust until there is a proper seal. Try different sized tips to ensure a proper seal.

WARNING

- 1 Fully dry off the earbuds before placing in charging cases.
- 2 If the earbuds are damp or wet, this could damage the earbuds and cause a fire. The warranty will be voided if the charging case shows damage by water/leakage.
- 3 Do not deform the ear hooks. The ear hooks are a flexible design but also have an internal structure for the antenna. Prying on the ear hook may break or damage the antenna.
